Printed in Great Britain

Contents of Volume 79

Number 1, 7 July 1979

HAYES, P. H., GIRTON, J. R. and RUSSELL, M. A., Positional Information and the Bithorax Complex 1

HINES, W. G. S. and SMITH, J. M., Games Between Relatives . . 19

LINKENS, D. A., Theoretical Analysis of Beating and Modulation Phenomena in Weakly Inter-coupled van der Pol Oscillator Systems for Biological Modelling 31

NEWMAN, S. A., The un body: A Possible Structure for Transcriptionally Inactivated Chromatin Subunits 55

POMERANTZ, M. J. and GILPIN, M. E., Community Covariance and Coexistence 67

SHIGESADA, N., KAWASAKI, K. and TERAMOTO, E., Spatial Segregation of Interacting Species 83

MAROUDAS, N. G., On the Low Adhesiveness of Fluid Phospholipid Substrata 101

EGEL, R., The *lac*-Operon for Lactose Degradation, or rather for the Utilization of Galactosylglycerols from Galactolipids? . . . 117

BARD, J. B. L., A Quantitative Theory of Liver Regeneration in the Rat II: Matching an Improved Mitotic Inhibitor Model to the Data 121

Number 2, 21 July 1979

CONRAD, M., Unstable Electron Pairing and the Energy Loan Model of Enzyme Catalysis 137

RAPPAPORT, H. P., Evaluation of Group Contributions to Ligand Binding 157

NINIO, J., An Algorithm that Generates a Large Number of Geometric Visual Illusions 167

MURAKAMI, C. and TOMITA, K., Giant Transitory Excitation—A Thermokinetic Model 203

VAN DER STEEN, W. J. and TER MATT, A., Theoretical Studies on Animal Orientation I. Methodological Appraisal of Classifications 223

SONNENBERG, A., and BLUM, A. L., Simple Calculations of Volume Flow and Flow Rates Across the Pylorus 235

LETTERS TO THE EDITOR

DASGUPTA, B., A Generalized Prey–Predator Model . . . 243

RIGNEY, D. R., Note on the Kinetics and Stochastics of Induced Protein Synthesis as Influenced by Various Models for Messenger RNA Degradation 247

EVANS, C. H., Is rhe $A(G_0)$ State Time-independent? . . . 259

Number 3, 7 August 1979

ANDREWS, P. R. and JOHNSTON, G. A. R., Conformational Analysis of Muscimol, a GABA Agonist 263

TYSON, J. and SACHSENMAIER, W., Depression as a Model for Control of the DNA-Division Cycle in Eukaryotes . . . 275

KURGANOV, B. I. and LOBODA, N. I., Regulation of Enzyme Activity in Adsorptive Enzyme Systems 281

TERAMOTO, E., KAWASAKI, K. and SHIGESADA, N., Switching Effect of Predation on Competitive Prey Species 303

PERELSON, A. S. and WIEGEL, F. W., A Calculation of the Number of IgG Molecules Required Per Cell to Fix Complement . . . 317

AWERBUCH, T. E., SAMSON, R. and SINSKEY, A. J., A Quantitative Model of Diffusion Bioassays 333

ALERSTAM, T., Optimal Use of Wind by Migrating Birds: Combined Drift and Overcompensation 341

KLOPMAN, G., GRINBERG, H. and HOPFINGER, A. J., MINDO/3 Calculations of the Conformation and Carcinogenicity of Epoxy-metabolites of Aromatic Hydrocarbons; 7,8-Dihydroxy-9,10-oxy-7,8,9,10-Tetrahydrobenzo(a) pyrene 355

JORNE, J. and SAFRIEL, U. N., Linear and Non-linear Diffusion Models Applied to the Behaviour of a Population of an Intertidal Snail 367

KOHLER, H-H. and HECKMANN, K., Undirectional Fluxes in Saturated Single-file Pores of Biological and Artificial Membranes. I. Pores Containing no More Than One Vacancy . 381

HORHKE, K. and MCCORMICK, D. B., Correlation Between Biological Activity and the Number of Functional Groups Chemically Modified 403

Number 4, 21 August 1979

RICHARDSON, I. W. and ROSEN, R., Aging and the Metrics of Time . 415

SCHAUER, M. and HEINRICH, R., Analysis of the Quasi-Steady-State Approximation for an Enzymatic One-Substrate Reaction . . 425

BANDEKAR, J. and SATHYANARAYANA, B. K., Copper(II)-Nucleic Acid Interactions—A Conformational Study 443

COYNE, L. M., Neurotransmitters as Ion Shuttles in Regulation of Neural Activity 455

DUNIEC, J. T., SCULLEY, M. J. and THORNE, S. W., An Analysis of the Effect of Mono- and Di-valent Cations on the Forces Between Charged Lipid Membranes with Special Reference to the Grana Thylakoids of Chloroplasts 473

NOORDERGRAAF, A., LI, J. K.-J. and CAMPBELL, K. B., Mammalian Haemodynamics: A New Similarity Principle 485

TORNHEIM, K., Oscillations of the Glucolytic Pathway and the Purine Nucleotide Cycle 491

LETTERS TO THE EDITOR

SCHOEN, D. J., An Angiosperm Analogue to Megagametophyte Analysis 543

POST, W. M. III. and TRAVIS, C. C., Quantitative Stability in Models of Ecological Communities 547

Index to Volume 79

Adhesiveness, low, of fluid phospholipid substrate, 101
$A(G_0)$ state, is it time-independent? (letter), 259
Aging and the metrics of time, 415
ALERSTAM, T., Optimal use of wind by migrating birds: combined drift and overcompensation, 341
Algorithm that generates a large number of geometric visual illusions, 167
ANDREWS, P. R. and JOHNSTON, G. A. R., Conformational analysis of muscimol, a GABA agonist, 263
Angiosperm analogue to megagametophyte analysis (letter), 543
Animal orientation, theoretical studies on; methodological appraisal of classifications, 223
Aromatic hydrocarbons, MINDO/3 calculations of the conformation and carcinogenicity of epoxymetabolites of 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
AWERBUCH, T. E., SAMSON, R. and SINSKEY, A. J., A quantitative model of diffusion bioassays, 333

BANDEKAR, J. and SATHYANARAYANA, B. K., Copper(II)-nucleic acid interactions—a conformational study, 443
BARD, J. B. L., A quantitative theory of liver regeneration in the rat II: matching an improved mitotic inhibitor model to the data, 121
Beating and modulation phenomena in weakly inter-coupled van der Pol oscillator systems for biological modelling, theoretical analysis of, 31
Binding, ligand, evaluation of group contributions to, 157
Bioassays, diffusion, a quantitative model of, 333
Biological activity and the number of functional groups chemically modified, correlation between, 403
Birds, migrating, optimal use of wind by; combined drift and overcompensation, 341
Bithorax complex and positional information, 1
BLUM, A. L. (see SONNENBERG, A.), 235

CAMPBELL, K. B. (see NOORDERGRAAF, A.), 485
Carcinogenicity and conformation of epoxymetabolites of aromatic hydrocarbons, MINDO/3 calculations of; 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
Catalysis, enzyme, energy loan model of, and unstable electron pairing, 137
Cations, mono- and di-valent, an analysis of their effects on the forces between charged lipid membranes with special reference to the grana thylakoids of chloroplasts, 473
Chemically modified functional groups, number of, correlation with biological activity, 403

Chloroplasts, an analysis of the effect of mono-and di-valent cations on the forces between charged lipid membranes with special reference to the grana thylakoids of, 473
Chromatin subunits, transcriptionally inactivated, a possible structure for; the un body, 55
Community covariance and coexistence, 67
Conformation and carcinogenicity of expoxymetabolites of aromatic hydrocarbons, MINDO/3 calculations of; 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
CONRAD, M., Unstable electron pairing and the energy loan model of enzyme catalysis, 137
Copper(II)-nucleic acid interactions—a conformational study, 443
COYNE, L. M., Neurotransmitters as ion shuttles in regulation of neural activity, 455

DASGUPTA, B., A generalized prey-predator model (letter), 243
Depression as a model for control of the DNA-division cycle in eukaryotes, 275
Diffusion bioassays, a quantitative model of, 333
Diffusion models, linear and non-linear, applied to the behaviour of a population of an intertidal snail, 367
7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, MINDO/3 calculations of the conformation and carcinogenicity of epoxymetabolites of aromatic hydrocarbons, 355
DNA-division cycle in eukaryotes, depression as a model for control of, 275
DUNIEC, J. T., SCULLEY, M. J. and THORNE, S. W., An analysis of the effect of mono- and di-valent cations on the forces between charged lipid membranes with special reference to the grana thylakoids of chloroplasts, 473

Ecological communities, quantitative stability in models of (letter), 547
EGEL, R., The *lac*-operon for lactose degradation, or rather for the utilization of galactosylglycerols from galactolipids? 117
Electron pairing, unstable, and the enery loan model of enzyme catalysis, 137
Energy loan model of enzyme catalysis, and unstable electron pairing, 137
Enzymatic one-substrate reaction, analysis of the quasi-steady-state approximation for, 425
Enzyme activity in adsorptive enzyme systems, regulation of, 281
Enzyme catalysis energy loan model and unstable electron pairing, 137
Epoxymetabolites of aromatic hydrocarbons, MINDO/3 calculations of the conformation and carcinogenicity of; 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
Eukaryotes, depression as a model for control of the DNA-division cycle in, 275
EVANS, C. H., Is the $A(G_0)$ state time-independent? (letter), 259

Fluxes, undirectional, in saturated single-file pores of biological and artificial membranes. I. Pores containing no more than one vacancy, 381
Functional groups chemically modified, number of, correlation with biological activity, 403

GABA agonist, muscimol, conformational analysis of, 263
Galactolipids, the *lac*-operon for lactose degradation, or rather for the utilization of galactosylglycerols from?, 117
Galactosylglycerols from galactolipids, the *lac*-operon for lactose degradation, or rather for the utilization of?, 117
Games between relatives, 19
Giant transitory excitation—a thermokinetic model, 203
GILPIN, M. E. (see POMERANTZ, M. J.), 67
GIRTON, J. R. (see HAYES, P. H.), 1
Glucolytic pathway and the purine nucleotide cycle, oscillations of, 491
Grana thylakoids of chloroplasts, an analysis of the effect of mono- and di-valent cations on the forces between charged lipid membranes with special reference to, 473
GRINBERG, H. (see KLOPMAN, G.), 355

Haemodynamics of mammals: a new similarity principle, 485
HAYES, P. H., GIRTON, J. R. and RUSSELL, M. A., Positional information and the bithorax complex, 1
HECKMANN, K. (see KOHLER, H-H.), 381
HEINRICH, R. (See SCHAUER, M.), 425
HINES, W. G. S. and SMITH, J. M., Games between relatives, 19
HOPFINGER, A. J. (see KLOPMAN, G.), 355
HORIIKE, K. and MCCORMICK, D. B., Correlation between biological activity and the number of functional groups chemically modified, 403

IgG molecules required per cell to fix complement, a calculation of the number of, 317
Ion shuttles in regulation of neural activity, neurotransmitters as, 455

JOHNSTON, G. A. R. (See ANDREWS, P. R.), 263
JORNE, J. and SAFRIEL, U. N., Linear and non-linear diffusion models applied to the behaviour of a population of an intertidal snail, 367

KAWASAKI, K. (See SHIGESADA, N.), 83
KAWASAKI, K. (see TERAMOTO, E.), 303
KLOPMAN, G., GRINBERG, H. and HOPFINGER, A. J., MINDO/3 calculations of the conformation and carcinogenicity of epoxymetabolites of aromatic hydrocarbons; 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
KOHLER, H-H. and HECKMANN, K., Undirectional fluxes in saturated single-file pores of biological and artificial membranes. I. Pores containing no more than one valency, 381
KURGANOV, B. I. and LOBODA, N. I., Regulation of enzyme activity in adsorptive enzyme systems, 281

lac-operon for lactose degradation, or rather for the utilization of galactosylglycerols from galactolipids?, 117
LI, J. K.-J. (See NOORDERGRAAF, A.), 485

Ligand binding, evaluation of group contributions to, 157
LINKENS, D. A., Theoretical analysis of beating and modulation phenomena in weakly inter-coupled van der Pol oscillator systems for biological modelling, 31
Lipid membranes, charged, an analysis of the effect of mono- and di-valent cations on the forces between (with special reference to the grana thylakoids of chloroplasts), 473
Liver regeneration in the rat, a quantitative theory of; matching an improved mitotic inhibitor model to the data, 121
LOBODA, N. I. (see KURGANOV, B. I.), 281

MCCORMICK, D. B. (see HORIIKE, K.), 403
Mammalian haemodynamics: a new similarity principle, 485
MAROUDAS, N. G., On the low adhesiveness of fluid phospholipid substrata, 101
Megagametophyte analysis, an angiosperm analogue to (letter), 543
Membranes, biological and artificial, undirectional fluxes in saturated single-file pores of; pores containing no more than one vacancy, 381
Messenger RNA degradation, note on the kinetics and stochastics of induced protein synthesis as influenced by various models for (letter), 247
Migrating birds, optimal use of wind by; combined drift and overcompensation, 341
MINDO/3 calculations of the conformation and carcinogenicity of epoxymetabolites of aromatic hydrocarbons; 7,8-dihydroxy-9,10-oxy-7,8,9,10-tetrahydrobenzo(a) pyrene, 355
Mitotic inhibitor model, matching to data of; a quantitative theory of liver regeneration in the rat, 121
Model for control of the DNA-division cycle in eukaryotes, depression as a, 275
Model, energy loan, of enzyme catalysis, and unstable electron pairing, 137
Model, prey-predator, generalized (letter), 243
Model, quantitative, of diffusion bioassays, 333
Model, thermokinetic, of giant transitory excitation, 203
Modelling, biological, theoretical analysis of beating and modulation phenomena in weakly inter-coupled van der Pol oscillator systems for, 31
Models of ecological communities, quantitative stability in (letter), 547
Models, diffusion, linear and non-linear, applied to the behaviour of a population of an intertidal snail, 367
Modulation and beating phenomena in weakly inter-coupled van der Pol oscillator systems for biological modelling, theoretical analysis of, 31
MURAKAMI, C. and TOMITA, K., Giant transitory excitation—a thermokinetic model, 203
Muscimol, a GABA agonist, conformational analysis of, 263

Neurotransmitters as ion shuttles in regulation of neural activity, 455
NEWMAN, S. A., The un body: a possible structure for transcriptionally inactivated chromatin subunits, 55
NINIO, J., An algorithm that generates a large number of geometric visual illusions, 167
NOORDERGRAAF, A., LI J. K.-J. and CAMPBELL, K. B., Mammalian haemodynamics: a new similarity principle, 485
Nucleic acid-copper(II) interactions—a conformational study, 443

Orientation, animal, theoretical studies on; methodological appraisal of classifications, 223
Oscillations of the glucolytic pathway and the purine nucleotide cycle, 491

PERELSON, A. S. and WIEGEL, F. W., A calculation of the number of IgG molecules required per cell to fix complement, 317
Phospholipid substrata, on the low adhesiveness of, 101
POMERANTZ, M. J. and GILPIN, M. E., Community covariance and coexistence, 67
Pores, saturated, single-file, of biological and artificial membranes, undirectional fluxes in; pores containing no more than one vacancy, 381
Positional information and the bithorax complex, 1
POST, W. M. III and TRAVIS, C. C., Quantitative stability in models of ecological communities (letter), 547
Predation, switching effect on competitive prey species, 303
Prey-predator model, generalized (letter), 243
Protein synthesis, induced, note on the kinetics and stochastics of, as influenced by various models for messenger RNA degradation (letter), 247
Purine nucleotide cycle and the glucolytic pathway, oscillations of, 491
Pylorus, simple calculations of volume flow and flow rates across, 235

Quasi-steady-state approximation for an enzymatic one-substrate reaction, analysis of, 425

RAPPAPORT, H. P., Evaluation of group contributions to ligand binding, 157
Rat, a quantitative theory of liver regeneration in; matching an improved mitotic inhibitor model to the data, 121
Relatives, games between, 19
